Building Valuation Multipliers

BUILDING VALUATION MULTIPLIERS FOR BUILDING PERMIT FEES	
The Building permit and plan check fees are calculated using a valuation for construction. This valuation is derived from the 2016 Building Valuation Multipliers published by the San Diego Area Chapter of the International Code Council (Table 1). Use this table to determine the <i>construction valuation</i> and use the Building Permit Fee Table to determine the <i>permit fee</i> based on the total construction valuation.	
<p>Example: Office building 10,000 sq. ft., construction type VB:</p> <p>Step 1 – Determine the project's construction valuation using Table 1.</p> <p>Ex. $10,000 \times \\$104.78 = \\$1,047,800.00 =$ Construction Valuation</p> <p>Step 2 – Determine the project's Building Permit Fee using Table 2, found on page 19.</p> <p>Ex. \$1,000,001 and up, $\\$3,534.00 + \\$95.52(\\$1.99 \times 48 (1000's)) = \\$3,629.52$</p> <p>Step 3 – Building Plan Check fee is 70% of the Building Permit Fee.</p> <p>Ex. Building Plan Check Fee: $\\$3,629.52 \times 70\% = \\$2,540.66$</p>

Deposits and Securities

Note: These are not fees. Rather, the city may require you to provide security to ensure work related to your project is completed in accordance with the Carlsbad Municipal Code and development agreements executed between you and the city. This information is to help you understand the standard structure of how these deposits and securities are calculated. The security amounts are calculated using final city-approved cost estimates, not initial or draft estimates during plan check.
